# CSS Links

# CSS Links

- Any CSS property (color, font-size, etc.) can be used to style Links.

- The links have four states:

**a:link** : Normal state, unvisited link

**a:visited :** Link which is visited before

**a:hover :** Mouse over state

**a:active :** Link which is clicked

WAY TO REINVENT YOURSELF

# CSS Links

CSS Links

- When declaring the link states, this order is recommended.

```
a:link {
  color: black;
}

a:visited {
  color: purple;
}

a:hover {
  color: red;
}

a:active {
  color: blue;
}
```
